#	INQUIRY	RESPONSE
1	Since a parking lot building is introducing to the tender, will the floors which were provided for parking in the main building still to be used for Parking?	Since a parking lot building is been introduced, only basement will be provided for parking in the main building.
2	What will be use of basement now?	The basement shall only for parking.
3	Please provide the allocated location, size and required number of floors for the new parking structure?	The plot is perpendicular to the proposed 15 story Media building. The approximate size of the parking lot is 147 feet X 31 feet. Parking lot building should be designed to full fill the requirement of Male building plan. Tenderers are to calculate the total number of floors that required to be build on the area specified above.
4	Please clarify if survey and EIA are required?	Tenderers are to fulfill the geotechnical surveys and EIA requirements if required.
