#	INQUIRY	RESPONSE
1	According to addendum 3, it will be	Yes.
	adjacent to the proposed media building	
	and was considered to be perpendicular in	
	reference with the street location. After	
	calculating the areas needed, since it will	
	be in a totally separated building, area for	
	parking shall require at least 7 levels with	
	the plot given. Nevertheless, the width	
	given is too narrow to fit a road network	
	and ramp for motorbikes, and we are	
	suggesting to have the basement and	
	ground floor in the media building to	
	accommodate 4-wheel parking and the	
	parking building solely for motorbike	
	parking. In this manner, we can lower the	
	level of parking to at least 5 floors, save	
	cost and manage the road network	
	properly. Only, downside is we will be	
	taking one level from the leasable floor	

	<u> </u>	
	area of offices in the media building. Will	
	this proposal be considered to be okay?	
2	The width given is too narrow and access	Yes.
	given is in Ameenee Magu. Will it be	
	possible that we have an entrance in this	
	street and an exit in Rehendhi Hingun?	
3	Can we request for an update AutoCAD file	PSM does not have an AutoCAD file of
	from PSM showing their current building	the building or compound.
	location and the size?	
		A PDF Covert of an AutoCADD file shall
	I have placed layers of map and lines	be emailed to all Tenderers.
	together, but it shows that the Proposed	
	Media Building will overlap at some point in	
	the Proposed Parking Building.	
4	The current public information desk /lobby	Yes.
	in their entrance will be affected. Will it be	
	Okay, if we propose that area as a	
	connecting point/lobby/ or corridor to	
	connect both building?
